Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

Represents gross shipments and receipts less minerals transferred to other establishments for treatment, or less minerals received from other establishments for treatment, and less resales of products purchased for resale without further processing.

Excludes figures for the Uranium-Radium-Vanadium Ores Industry.

Excludes figures for Alaska.

Represents number of mines.

Except for number of establishments includes data for 27 nonproducing establishments in the Nonmetallic Minerals Mining Industries. See also footnote 3.

Excludes data for nonproducing establishments.

Except for number of establishments, excludes figures for 1 chromite mine in Alaska.

Excludes purchased electric energy. For 1929, the quantity of purchased electric energy amounted to 8 percent of the total kwh equivalent of energy used.

Except for number of operating companies and number of establishments, includes data for 2 producing and 18 nonproducing establishments in the nonmetallic minerals mining industries, for which separate figures were not available.

Represents the sum of the number of operating companies in individual industries or available groups of industries. Probably includes some duplication due to the same company operating in more than one industry.

For 1902, data were obtained from the operators of metal mines on the average number of employees at contract service operations performed for them. The total number of such employees was reported as 8,527.

Figures for average employment were converted to a 300-day basis for establishments which operated for a shorter period.

Excludes data for the Manganese Ores Industry.

Includes an estimated value added for the Placer Gold Industry.

Excludes costs for the Placer Gold Industry.
